## ABIDE BY ROHS

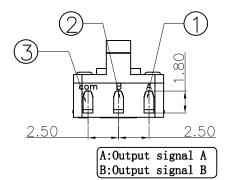

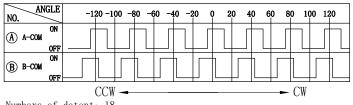

D

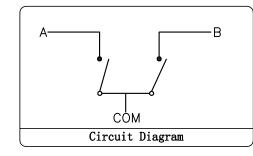

Numbers of detent: 18 Pulse/Rotation: 9 Pulse/360° (reverse)

# Shaft hole shape and dimension Shaft hole position will be at random (Tolerance: ±0.1) (P. C. Bthickness t=1.6mm)

#### Remark:

The pinholes on the back of the base is made according to product requirements to set the molding, its specifications and quantity of the number without any effect on the product structure, function and use.;

## ■ Specification :

- 1. Rated voltage: D.C.5V
- 2. Maximum operating current (resistive load)
  Each lead :1mA
- 3. Resolution: 9 pulses/360° for each phase
- 4. Contact Resistance:  $10 \Omega$  (Max)
- 5. Insulation resistance:  $50M\Omega$  (Min) DC50V
- 6. Dielectric strength: AC50V(50-60Hz) for 1 minute
- 7. Detent torque: 15-30 gf.cm
- 8. Life Test :100,000 Cycles(min)

## 1. Scope:

This Product Specification covers the requirement of Encoder switch on product performance, test methods and quality assurance provisions.

#### 2. Product Application:

The Switch is applied in all types of Computer mouse. Please let us know before using any of the products in the application not described above.

## 3. Technology Parameters

Ambient Humidity:

Operating Temperature Range:

Storage Temperature Range:

Normal Condition:

Ambient temperature:

Relative humidity:

Air pressure:

Contact Resistance:

Torque Force:

Solder Ability:

Withstand Soldering Temperature:

Pulse/Rotation:

Numbers of detent :

≤85% R.H.:

-15℃~+70℃;

-20℃~+80℃;

20±5℃

65% ± 5% R.H.:

86~101KPa;

10  $\Omega$  Max:

15-30gf.cm;

Tim-lead soldering :  $245^{\circ}C \pm 5^{\circ}C$   $5s \pm 0.5s$ ;

Lead-free welding :  $255^{\circ}C \pm 5^{\circ}C$   $5s \pm 0.5s$ 

Wave soldering:  $260\pm5\%$  5 $\pm0.5$ s

## 9. Packaging

Packaging type: PE Bag, 500Pcs/Bag, 2\*500\*10Pcs/Carton.

#### 11.Precaution

11.1 Immersion Soldering condition

ITEM	CONDITION
Preheat temperature	110℃ Max (Ambient temperature of soldering surface of P.W.B)
Preheat time	60s, Max
Area of flux	1/2 Max of PWB Thickness
Temperature of solder	260±5℃
Time of immersion	Within 5s
Number of soldering	2times Max (But should down heat of the first soldering)
Printed wiring board	Single side copper-clad laminates

- (1) After switches were soldered, please be careful not to clean switches with solvent
- (2) Under the condition of using soldering iron, soldering temperature shall be 350 ℃ max within 3 sec.

#### **11.2 Notes**

- (1) Please be cautious not to give excessive static load or shock to switches.
- (2) Please be careful not to stack up P. W. B. after switches were soldered.
- (3) Preservation under high temperature and high humidity or corrosive gas should be avoided Especially. When you need to preserve for a long period, do not open the carton.
- (4) The standard storage period is 3 months, with maximum up to 6months, preferably to be used as soon as possible. After opening the package, you should put the remaining switches in a plastic bag to prevent from damp and corrosive gas.
- (5) This Product Specification is considered as the technical agreement on product between the receiving customer and Kailh. Any information on Product Catalogue which is in conflict with or different from the corresponding information of this document is considered as invalid.
- (6) If customer issue purchase orders without confirmation by signature of this specification after receipt, such confirmation will be considered as granted upon receipt of the first purchase order.
- (7) If there is no order or no request for new specification after 1 year upon this specification is issued, the specification will be regarded as invalid.
- (8) Products meet the ROHS & REACH environmental management substances control standards
